# India's most advanced GST billing software

Features

Sale Management

Our billing software helps in managing sales better and increases overall efficiency. Now manage from Non GST / GST invoices to multi-rate invoices, credit sales to cash sales, sales commission to multi-size invoices at a click.

Purchase Management

It helps in managing stock purchase and supplier accounts. Now manage from purchase bills to purchase returns, supplier ledgers to payments, purchase analysis to stock analysis at a click.

Goods and Service Tax

Our billing software is 100% GST compatible and generate various types of GSTR reports like GSTR-1, GSTR-3B and compatible reports for auditor. Supports multi-rate invoices and purchase bills.

Inventory Management

Our software helps in keeping tab on inventory and informs about low stock, availability, items not selling, fast moving items and cost profit analysis. Multiple inventory reports for taking informed decisions.

Client Management

Our billing software brings everything related to a client on single dashboard where you can set credit limit, generate payment receipts, adjust accounts, generate invoices, set cheque alerts, and many more.

Staff Management

Billing software comes with India's most advanced staff management module having built-in fingerprint / biometric based fully automated attendance system. Generate salary based on attendance and sales commissions. Manual attendance also supported.

Multi-size Invoices

Our billing software supports multiple types of invoice print sizes like A4, A5, and PoS receipts. Our Dual Channel Printing Engine allows to generate invoices at the rate 2 per second (with preview) and 10 per second (without preview).

Barcode Read / Write

Billing Software is capable of generating barcode in multiple sizes and generated barcodes can be auto-saved. All plug n play barcode scanners are supported for faster billing. Our advanced algorithms can automatically detect most of the scanners.

SMS / Email

Our billing software comes with built-in advanced SMS Server (Queue Enabled) having burst rate up to 50 SMS per second. Most of the SMS API's and Email Gateways are supported.

Point of Sale Support

Our software supports most the PoS printers available in market and receipts can be generated in 2 / 3 / 3.5 / 4 inch. sizes. Our advanced algorithms can generate PoS invoice at the rate of up to 45 receipts per minute.

Data Management

Our billing software comes with advanced data management tools which keeps your data secure and can take backup automatically (2 backup locations supported). Now no need to remember about taking backups.

Android App

Our billing software allows you to keep tab on your business activities while on the move using our Android App. Get monthly and daily sales, payments, purchase, expense, and staff attendance figures on your smartphone.
